

Dauphin Age-Friendly Committee City of Dauphin – Joint Committee

The Dauphin Age-Friendly Committee was struck in the Spring of 2009 to address issues related to creating an age-friendly community. The purpose of this committee is to be aware of age-friendly initiatives and issues that affect our community and work together to address them.

An age-friendly is characterised by:

- **R**ecognizing the diversity among older Manitobans
- **E**ncouraging healthy, active aging
- **S**upporting the contributions of older Manitobans
- **P**romoting the participation of older Manitobans in all aspects of our community
- **E**ngaging stakeholders in building age-friendly communities
- **C**reating accessible, safe environments for older adults
- **T**reating people of all ages with respect

One of the initiatives of the age-friendly committee is to assess and promote pedestrian safety in our City. We would like to take this opportunity to thank you for being part of our project by assisting us with the attached questionnaire. You are part of a larger group assessing pedestrian safety in our community. The age-friendly committee plans to make the results of this assessment available to the public at a community BBQ May 20 11AM – 2PM at the City Hall courtyard. In appreciation, you are cordially invited to attend.

Pedestrian Safety Questionnaire

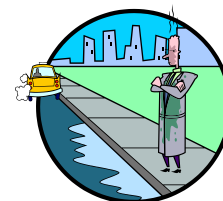

Date: _____ Time: From: _____ to: _____

Observation location: _____

[if at an intersection, please reference both streets]

Sidewalks on both sides of all streets: _____ Yes _____ No
